Introducing SCC Link: Making it Easier to Find Help for Substance Use

The St. Clair County Health Department (SCCHD) is excited to introduce [SCC Link](#), a new way to help people struggling with substance use find local support. SCC Link is a survey residents can take online that produces personalized referrals to local agencies based on how questions are answered. It's easy to use and designed to make finding help quick and simple.

"We're excited to bring SCC Link to the community," said Liz King, Health Officer - Director at the St. Clair County Health Department. "With this tool, we want to make sure that anyone who needs help can find it easily."

Key features of SCC Link include:

- **Easy-to-Use:** SCC Link is designed to be simple and straightforward, so you can find help without any hassle.
- **Personalized Help:** It uses smart technology to match you with support that fits your needs, so you get the help that's right for you.
- **Up-to-Date:** SCC Link keeps its list of places and support services updated all the time, so you always have the latest info.
- **Safe and Private:** Your privacy is important. SCC Link keeps your information secure and confidential.

SCC Link represents a collaborative effort between various community organizations, all committed to addressing the challenges associated with substance use and fostering a culture of support. Substance use was identified as a priority in the latest St. Clair County [Community Health Improvement Plan \(CHIP\)](#), underscoring the importance of such partnership.

For additional county resource information, contact the St. Clair County Health Department at (810) 987-5300, visit www.scchealth.co or follow us on social media @scchdmi.
