### **Health Department Issues Swimming Advisory for Holland Beach**

The St. Clair County Health Department (SCCHD) has issued a swimming advisory for Holland Beach in Port Huron due to elevated levels of *E. coli* in the water. Water samples will be collected at Holland Beach until *E. coli* test results are within the acceptable water quality range as advised by the State of Michigan.

*E. coli* bacteria are a common microbe found in the digestive systems of warm-blooded animals, including humans, and can indicate the presence of fecal contamination. Beach goers should be aware elevated *E. coli* levels are possible after a storm or strong winds because bacteria are carried in storm water runoff, including drainage from creeks and ditches, and stirred up from waves.

Advisories for St. Clair County's public beaches are shared on the SCCHD's "[St. Clair County Beaches](#)" Facebook page and [EGLE's Beachguard](#) website.

For more information, visit [www.sccchealth.co](http://www.sccchealth.co) or contact the SCCHD Environmental Health Division at (810) 987-5306. Follow us on social media @stclaircountybeaches.
