Swimming Advisory Canceled for Holland Beach

The St. Clair County Health Department (SCCHD) has canceled the water quality swimming advisory for Holland Beach. Bacteria levels indicate the beach is now safe for swimming.

A water quality swimming advisory was originally put in place on June 26, 2025 due to elevated *E. coli* bacteria test results. Additional water samples were collected at the affected beach and *E. coli* tests now show results are within the acceptable water quality range as dictated by the State of Michigan. Elevated *E. coli* levels are possible after a storm or strong winds because bacteria are carried in storm water runoff, including drainage from creeks and ditches, and stirred up from waves.

Advisories for St. Clair County's public beaches are shared on the SCCHD's "[St. Clair County Beaches](#)" Facebook page and [EGLE's Beachguard](#) website.

For more information, visit www.scchealth.co or contact the SCCHD Environmental Health Division at (810) 987-5306. Follow us on social media @stclaircountybeaches.
